EXPERIENCE

Software Engineer — Arcanys, Ltd. *(Remote)*

2025 — Present · Building media and digital asset management platforms with React + TypeScript.

- Contributed to the core browsing experience for **Mediaframe**: library navigation, album pages, and home page tiles.
- Owned key user flows including guided tours, reset/change password, and asset move operations.

Engineer II — Samsung Electronics *(Hybrid)*

2022 — 2025 · Shipped features across Cloud, Quick Share, and Digital Legacy.

- **Digital Legacy**: built check-progress pages for tracking digital heritage requests and document preview features for in-app viewing.
- **Cloud**: built storage-quota visualizations, sync-status indicators, and device-management views; incrementally migrated legacy Redux flows to a modern architecture.
- **Quick Share**: improved legacy code performance, resolved long-standing technical debt, and enhanced media previews and the download experience.
- Recognized as Team Member of the Month (Dec 2022, Dec 2023).

Lead Engineer — Last Mile, Inc. *(Remote)*

2020 — 2022 · Logistics apps with route planning, real-time tracking, and dispatch.

- Led front-end for **Fleet™ PH** web and mobile: tracking dashboard, driver assignment, and delivery status.
- Owned architecture decisions, deployments, and client communication as lead.
- Built courier integrations and the job-creation flow (manual entry, bulk import, provider selection) for **Deliveries™ PH**.

Junior Engineer — Codegum, Inc. *(Onsite)*

2019 — 2020 · Built features for a cashflow and inventory-tracking SaaS used by local businesses.
